

MUHAMMED QAIS

Full-Stack Developer · Distributed Systems · Real-Time Applications · Node.js

+91 7025211871 · qaismon127@gmail.com · [linkedin.com/in/muhammed-qais-mon](https://www.linkedin.com/in/muhammed-qais-mon) · github.com/qaismon · qaismon.github.io/portfolio
· Kerala, India

PROFESSIONAL SUMMARY

Full-stack Developer focused on building scalable backend systems, real-time applications, and fault-tolerant distributed workflows using Node.js, React, MongoDB, Redis, and modern cloud tooling. Hands-on experience developing production-grade systems involving concurrency handling, asynchronous job processing, real-time communication, payment orchestration, and API optimization. Strong understanding of system reliability, performance tuning, and distributed architecture patterns through project-driven engineering and real-world deployments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, Redux, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, Redis, PostgreSQL

Real-Time: WebSockets, Socket.io, BullMQ, WebRTC

DevOps: Docker, AWS EC2, PM2, Nginx, Git

Concepts: Distributed Systems, System Design, RBAC, API Optimization, Load Testing (k6), E2E Encryption

PROFESSIONAL EXPERIENCE

Software Developer Intern · Bridgeon Solutions, Kerala, India · Aug 2025 – Present

- Designed production REST APIs for authentication and real-time workflows; optimized MongoDB queries/indexing, reducing response time **~25%**.
- Built **async event-driven workflows** using Node.js and Socket.io; resolved backend issues in staging and production, improving system reliability.

Customer Support Associate | Elaf Fresh E-Commerce | Dubai, U.A.E · Apr 2022 – May 2023

- Handled 50+ customer interactions per day, identifying recurring platform bugs and UX issues.
- Reported 40+ actionable bugs to development teams, acting as a structured QA bridge between users and engineers.
- Reduced average issue resolution time by streamlining communication between support and dev teams.

TECHNICAL PROJECTS

Seatzo – Distributed Event Ticketing Platform · React, Node.js, MongoDB, Redis, Stripe, BullMQ · seato.vercel.app · [GitHub](#)

- Built distributed **Redis-based seat locking** to prevent double-booking; implemented **saga-based payment orchestration** with **BullMQ** and compensating transactions for failure recovery.
- Developed real-time seat sync with automatic lock expiry, multi-tab protection, and **RBAC** dashboards for customers, organisers, and admins.
- Developed secure **Stripe payment workflows** with webhook verification, **idempotency** handling, and QR-based ticket generation.
- Implemented **JWT authentication** with refresh token rotation, Google OAuth login, and protected route authorization.

RevChat – AI Code Review & Collaboration Platform · Next.js, Node.js, Socket.io, WebRTC, Groq AI · revchat.onrender.com · [GitHub](#)

- Real-time messaging** system with **~500ms latency** at ~80–90 req/sec; typing indicators, read receipts, file/voice messages, and **WebRTC** peer-to-peer calls.
- Implemented **end-to-end encryption** (RSA + AES) for secure peer-to-peer communication.
- Integrated **Groq AI** for structured code review in <2s; Redis-backed RBAC group sessions; deployed on **AWS EC2** with Nginx reverse proxy and PM2.

Gainlabz – Full-Stack E-Commerce Platform · React, Node.js, Express.js, MongoDB · gainlabz.onrender.com · [GitHub](#)

- Built a full-stack e-commerce platform covering product catalog, cart, orders, authentication, recommendations, wishlist, coupons, bundles, and one-click reorder.
- Engineered a **4-tier fuzzy search** with "Did you mean?" correction using **MongoDB Atlas Search**, text indexes, and Fuse.js, reducing zero-result queries from typos to near zero.
- Developed **15+ REST APIs** and optimized MongoDB query performance (**3.8s** → **200–500ms**).
- Implemented **JWT auth**, **Razorpay payment verification**, **Cloudinary image uploads**, and k6 load testing (0% failure).

EDUCATION

BSc. Business Management (In Progress) · Westford University College, Sharjah, UAE

Self-Study & Online Courses:

- Full-Stack JavaScript (Node.js, React, MongoDB) — Udemy / ZTM
- AWS Cloud Practitioner Essentials — AWS Skill Builder (ongoing)
- Docker & Container Orchestration — self-study with hands-on project deployments
- System Design & Scalability — study of distributed systems patterns and concurrency models
